Lists of metalloids The elements most often regarded as metalloids are boron, silicon, germanium, arsenic, antimony and tellurium. p. 135 Petrucci RK 1989, General chemistry: Principles and modern applications This
is a list of 194 sources that list elements classified as metalloids. 292 Malone LJ 1989, Basic concepts of chemistry, John Wiley and Sons, New York, p. Individual lists share common ground, with variations occurring
at the margins. Lists of metalloids differ since there is no rigorous widely accepted definition of metalloid (or its occasional alias, 'semi-metal'). The sources are listed in chronological order. Other sources may subtract
from this list, add a varying number of other elements, or both 256048d801
