It builds upon a selection of relevant and practical papers and presentations given at the 2nd International Conference on Evaluating Climate Change and Development held in Washington DC in 2014 and includes perspectives from independent evaluations of the major international organisations supporting climate action in developing countries, such as the Global Environment Facility. Collectively, the authors illustrate the importance of evaluation in providing evidence to guide policy change to informed decision-making. The authors share methodologies or approaches used to better understand problems and assess interventions, strategies and policies. The first section of the book sets the stage and provides an overview of independent evaluations, carried out by multilateral development banks and development organisations. They also share challenges encountered, what was done to solve these and lessons learned from evaluations. Important topics include how policies and organisations aim to achieve impact and how this is measured, whether climate change is mainstreamed into other development programs, and whether operations are meeting the urgency of climate change challenges. This authoritative book presents the ever progressing state of the art in evaluating climate change strategies and action. This book is open access under a Creative Commons license. The following sections focus on evaluation of climate change projects and policies as they link to development, from the perspective of international organisations, NGO's, multilateral and bilateral aid agencies, and academia e4ce063897

Continued efforts are needed to strengthen communications going forward. Several issues deserve particular attention. The framework is based on four guiding principles: (i) deepening understanding and support for the Fund's role and policies; (ii) better integrating communications into the IMF's daily operations; (iii) raising the impact of new communications materials and technologies; and (iv) rebalancing outreach efforts to take account of different audiences. Second, doing more to assess the impact of IMF communications and thus better inform efforts going forward. First, taking further steps to ensure clarity and consistency in communication in a world where demand for Fund services continues to rise. Third, engaging strategically and prudently with new media—including social media. In addition, greater emphasis has been placed on strengthening internal communications to help ensure institutional coherence in the Fund's outreach activities. The framework guiding the IMF's communications—established by the Executive Board in 2007—has enabled the institution to respond flexibly to the changing global context e4ce063897

Using personal experience and extensive interviews with principal decision-makers and stakeholders in the Panel's work, she chronicles the history of accountability in the World Bank and other major financial entities. It is time for the private financial sector to follow multilateral financial institutions in creating independent mechanisms, mediation procedures, and access to decision makers for people harmed or potentially harmed by projects financed by their institutions. From 1999 to 2004 Maartje van Putten served as a member of the World Bank's Inspection Panel. Policing the Banks is a passionate plea for global accountability for all powerful financial players - including the transnational private banks that are now entering the scramble for profits from development projects in the third world. Describing how formerly secretive financial institutions have been slow to accept responsibility for the consequences of their investments - especially the problems that can result from projects in developing countries - she shows that financing institutions can cause significant social and environmental damage and argues that new accountability mechanisms are necessary to reduce or prevent such damage. Because such institutions operate on a global scale, only semi-judicial accounting mechanisms can provide the necessary accountability e4ce063897

Raman shows, however, that the sheer volume of their document production allowed colonial managers to subtly but substantively manipulate records for their own ends, increasingly drawing the real and the recorded further apart. In order to assert its legitimacy and value within the British Empire, the East India Company was diligent about record keeping. Historians of British colonial rule in India have noted both the place of military might and the imposition of new cultural categories in the making of Empire, but Bhavani Raman, in Document Raj, uncovers a lesser-known story of power: the power of bureaucracy. Drawing on extensive archival research in the files of the East India Company's administrative

offices in Madras, she tells the story of a bureaucracy gone awry in a fever of documentation practices that grew ever more abstract—and the power, both economic and cultural, this created. Immersed in a subterranean world of delinquent scribes, translators, village accountants, and entrepreneurial fixers, Document Raj maps the shifting boundaries of the legible and illegible, the legal and illegitimate, that would usher India into the modern world. While this administrative sleight of hand increased the company’s reach and power within the Empire, it also bolstered profoundly new orientations to language, writing, memory, and pedagogy for the officers and Indian subordinates involved e4ce063897
