Importance "Intrinsic vs. This view is rejected by various theorists, who insist that an additional aspect is required: that the impact in question makes a value difference. According to the causal impact view, something is important if it has a big causal impact on the world. This is often understood in terms of how the important thing affects the well-being of people. Extrinsic Value",. Retrieved 30 June Importance is a property of entities that matter or make a difference. There are disagreements in the academic literature about what type of difference is required. For example, World War II was an important event and Albert Einstein was an important person because of how they affected the world. Metaphysics Research Lab, Stanford University. The Stanford Encyclopedia of Philosophy. Ben (2019). So in this view, World War II was important, not just because it brought about many wide-ranging changes but because these changes had severe negative impacts 7e90256443
