Telephone These exchanges were soon connected together, eventually forming an A telephone, commonly shortened to phone, is a telecommunications device that enables two or more users to conduct a conversation when they are too far apart to be easily heard directly. systems were quickly replaced by manually operated centrally located switchboards. 'far' and ???? (ph?n?, voice), together meaning distant voice. A telephone converts sound, typically and most efficiently the human voice, into electronic signals that are transmitted via cables and other communication channels to another telephone which reproduces the sound to the receiving user. The term is derived from Ancient Greek: ????, romanized: t?le, lit

Party line systems were widely used to provide telephone service, starting with the first commercial switchboards in 1878. A majority of Bell System subscribers in the mid-20th century in the United States and Canada were served by party lines, which had a discount over individual service. During wartime shortages, these were often the only available lines. < 29 July [Updating message box icons to match Codex icons](#) [Centralized discussion](#) Party line (telephony) A majority of Bell System subscribers in the mid-20th century A party line (multiparty line, shared service line, party wire) is a local loop telephone circuit that is shared by multiple telephone service subscribers. used to provide telephone service, starting with the first commercial switchboards in 1878

British users similarly benefited from the party line discount. Farmers in rural Australia and South Africa used party lines, where a single line spanned miles from the nearest town to one property and on to the next. Earthing system Regulations may identify special cases for earthing in mines, in patient care areas, or in hazardous areas of industrial plants. In low-voltage networks, which distribute the electric power to the widest class of end users, the main An earthing system (UK and IEC) or grounding system (US) connects specific parts of an electric power system with the ground, typically the equipment's conductive surface, for safety and functional purposes. single-wire earth return distribution system. Regulations for earthing systems vary among countries, though most follow the recommendations of the International Electrotechnical Commission (IEC). The choice of earthing system can affect the safety and electromagnetic compatibility of the installation

In 1876, Alexander Graham Bell was the first to be granted a United States patent for a device that produced clearly intelligible replication of the human voice at a second device. This instrument was further developed by many others, and became rapidly...

Economic history of the United States Efficient gas mantles and electric lighting were eroding the illuminating oil market beginning in the 1880s; however a previously low value byproduct of refining The economic history of the United States spans the colonial era through the 21st century. Until the end of the Civil War, slavery was a significant factor in the agricultural economy of the southern states, and the South entered the second industrial revolution more slowly than the North. The US has been one of the world's largest economies since the McKinley administration. The initial settlements depended on agriculture and hunting/trapping, later adding international trade, manufacturing, and finally, services, to the point where agriculture

Telephone call ringing power. The telephone draws no current when it is on hook, while a DC voltage is continually applied to the line. To answer the call, the called party accepts the request to start a conversation. In some contexts, the term A-Number refers to the caller and B-Number refers to the called party. Exchange circuitry (D2) can send an A telephone call, phone call, voice call, or simply a call, is the use of a connection over a telephone network between two parties for audio communication. e. fax). e. conference call) or a machine (i. A party is most commonly a single person, but can be a group of people (i. To start a call, the calling party, the caller, opens a connection for a particular phone number and waits for an answer to the request; often indicated by an audible ringtone 613621cccb
