Critical animal studies It emerged in 2001 with the founding of the Centre for Animal Liberation Affairs by Anthony J. Critical animal studies (CAS) (not to be confused with Animal Studies) is an educational field that critically examines human relationships with nonhuman Critical animal studies (CAS) (not to be confused with Animal Studies) is an educational field that critically examines human relationships with nonhuman animals, with a focus on social justice and animal liberation. Challenging the conventional anthropocentric views of humans on animals, it recognizes and acknowledges the inherent value of nonhuman animals and aims to create a more equitable and ethical relationship between humans and other animals. CAS applies critical theory to animal studies and animal ethics. Nocella II and Steven Best, which in 2007 became the Institute for Critical Animal Studies (ICAS). The core interest of CAS is animal ethics, firmly grounded in trans-species intersectionality 54508fa537

Global citizenship Extended, the idea leads to questions about the state of global society in the age of globalization. This does not mean that such a person denounces or waives their nationality or other, more local identities, but that such identities are given "second place" to their membership in a global community. Global citizenship is a form of transnationality, specifically the idea that one's identity transcends geography or political borders and that responsibilities Global citizenship is a form of transnationality, specifically the idea that one's identity transcends geography or political borders and that responsibilities or rights are derived from membership in a broader global class of "humanity" 54508fa537

Open border Open borders are the norm for borders between subdivisions An open border is a border that enables free movement of people and often of goods between jurisdictions with no restrictions on movement and is lacking a border control. An example of the latter has been the border between Bangladesh and India, which is becoming controlled. A border may be an open border due to intentional legislation allowing free movement of people across the border (de jure), or a border may be an open border due to a lack of legal controls, a lack of adequate enforcement or adequate supervision of the border (de facto). The term "open borders" applies only to the flow of people, not the flow of goods and services, and only to borders between political. and only to borders between political jurisdictions, not to mere boundaries of privately owned property. An example of the former is the Schengen Agreement between most members of the European Economic Area (EFTA and the EU) 54508fa537

Speculative design The term was popularised by Anthony Dunne and Fiona Raby as a subsidiary of critical design. It problematizes this relation by proposing provocative future design scenarios where technology and design implications are accentuated. The aim is not to present commercially-driven design proposals but to design proposals that identify and debate crucial issues that might happen in the future. Speculative design is concerned with future consequences and implications of the relationship between science, technology, and humans. 'Design Noir: The Secret Life of Electronic Objects,' as "Instead of thinking about appearance, user-friendliness or corporate identity, industrial designers Speculative design is a design practice concerned with future design proposals of a critical nature.
