There are three levels of complexity in English Braille. Grade 1 is a nearly one-to-one transcription of printed English and is restricted to basic literacy. Grade 2, which is nearly universal beyond

basic literacy materials, abandons one-to-one transcription in many places (such as the letter ? for?) and adds hundreds of abbreviations and contractions. Both Grade 1 and Grade 2 have been standardized. "Grade 3" is any of various personal shorthands that are almost never found in... 1af0728711

Traditional mathematics education has been challenged by several reform movements over the last several decades, notably new math, a now largely abandoned and discredited set of alternative methods, and most recently reform or standards-based mathematics based on NCTM standards, which is federally supported and has been widely adopted, but subject to ongoing criticism 1af0728711

Hilbert's problems Earlier publications (in the original German) appeared in Archiv der Mathematik und Physik. They were all unsolved at the time, and several Hilbert's problems are 23 problems in mathematics published by German mathematician David Hilbert in 1900. Hilbert presented ten of the problems (1, 2, 6, 7, 8, 13, 16, 19, 21, and 22) at the Paris conference of the International Congress of Mathematicians, speaking on August 8 at the Sorbonne. Hilbert's problems are 23 problems in mathematics published by German mathematician David

Hilbert in 1900. The complete list of 23 problems was published later, in English translation in 1902 by Mary Frances Winston Newson in the Bulletin of the American Mathematical Society.
