A PL/I American National Standards Institute (ANSI) technical standard, X3.53-1976, was published in 1976. d3e9db4877 The SACD format allows multiple audio channels (i.e. surround sound or multichannel sound). It also provides a higher bit rate and longer playing time than a conventional CD. d3e9db4877

PL/I It has been in continuous use by academic, commercial and industrial organizations since it was introduced in the 1960s. It is designed for scientific, engineering, business and system programming. Data General, Digital Equipment Corporation, Prime Computer, Burroughs, RCA, and Univac served on X3J1 along with major users Eastman Kodak, MITRE, Union PL/I (Programming Language One, pronounced and sometimes written PL/1) is a procedural, imperative computer programming language initially developed by IBM d3e9db4877

LaserDisc Due to its relatively small market LaserDisc (LD) is a home video format and the first commercial optical disc storage medium. While the LaserDisc brand originally referred specifically to Pioneer's line of players, the term gradually came to be used generically to refer to the format as a whole, making it a genericized trademark. The discs typically have a diameter of 300 millimeters (11. It was developed by Philips, Pioneer, and the movie studio MCA. Unlike most later optical disc formats, LaserDisc is not fully digital; it stores an analog video signal. The format was initially marketed in the United States in 1978 under the name DiscoVision, a brand used by MCA. signal would be implemented, was used for timecode and frame coding as well as player control codes on LaserDisc players. 8 in), similar in size to the 12-inch (305 mm) phonograph record. As Pioneer took a greater role in its development and promotion, the format was rebranded LaserVision d3e9db4877

SCART The related European standard EN 50049 was refined and published in 1978 by CENELEC, calling it péritélévision, but it is commonly called by the abbreviation péritel in French. The SCART connector first SCART (also known as Péritel or Péritélévision, especially in France, 21-pin EuroSCART in marketing by Sharp in Asia, Euroconector in Spain, EuroAV or EXT, or EIA Multiport in the United States, as an EIA interface) is a French-originated standard and associated 21-pin connector for connecting audio-visual (AV) equipment. The name SCART comes from Syndicat des Constructeurs d'Appareils Radiorécepteurs et Téléviseurs, "Radio and Television Receiver Manufacturers' Association", the French organisation that created the connector in the mid-1970s. through a German-originated DIN-style connector, an American-originated RCA connector, an SO239 connector or a BNC connector d3e9db4877

Digital Compact Cassette Another competing format, the Digital Audio Tape (DAT), had by 1992 also failed to sell in large quantities to consumers, although it was popular as a professional digital audio storage format. It was also a direct competitor to Sony's MiniDisc (MD), but neither format toppled the then-ubiquitous analog cassette despite their technical superiority and was discontinued after 4 years in the marketplace. time codes remain continuous (and the tape remains a super user tape), the user should start every recording at a point where absolute time codes are available Digital Compact Cassette (DCC) is a discontinued magnetic tape sound recording format introduced by Philips and Matsushita Electric in late 1992 and marketed as the successor to the standard analog Compact Cassette d3e9db4877

Plugs have 2 to 5 electrical contacts. The tip contact is indented with a groove. The sleeve contact is nearest the (conductive or insulated) handle. Contacts are insulated from each other by a band of non-conductive material. Between the tip and sleeve are 0 to 3 ring contacts.
