

Contracts A Context And Practice Casebook

" -- Bruce Price, University of San Francisco School of Law "[Contracts] is brilliant. Unfortunately, it is fantastic -- everything I've been looking for. "The contextual approach keeps students engaged and excited. The comprehensive Teacher's Manual includes PowerPoint slides keyed to the text and dozens of multiple choice and essay questions (with answers and explanations) and is printed with a CD included. Right up front, the authors tell students the learning objectives of the

course. The supplementary materials are plentiful (the CD and the TM). Contracts also includes a rolling graphic organizer that unfolds as students work through the text, as well as exercises designed to build students self-directed learning strategies. \" -- Stephen Friedman, Associate Professor of Law, Widener University School of Law \"[This] is the first law school textbook I've seen where it is obvious that the authors really want to help students understand what they are supposed to be learning in the course. In April 2012, the Institute for the Advancement of the American Legal System recognized Professor Schwartz as an Educating Tomorrow's Lawyers fellow and his course as one that advances reform in legal education. \" -- Roy Stuckey, author of Best Practices for Legal Education (2007), in The Law Teacher \"I had a chance to look at your Contracts casebook and I loved it. \" -- Roberto Corrada, University of Denver College of Law\"I received this new casebook with great hope that it would be horrible so I wouldn't have to go through the ordeal of switching. The book balances traditional cases with wonderfully

designed problems and exercises that get students to think (and often act) like lawyers. Every chapter in this innovative casebook places students in roles as practitioners handling simulated law practice problems; provides context in the form of an overview of the law, similar to that which an attorney would read before reading cases in a new subject area; includes questions designed to encourage students to find the applicable statutes and cases on point in the state where the student is planning to practice law; includes exercises, visual aids, and case reading scaffolds, designed to engage students with a wide range of learning styles; and ends with professionalism questions addressing ethical and professional identity questions suggested by the materials in the chapter. Students will find the book as intellectually challenging as any textbook they will encounter, but students who diligently work their way through the book should emerge with a solid understanding of contract law, and much more. After having revolutionized how to most effectively teach law students, Schwartz has produced an amazing doctrinal

resource that will change how Contracts is taught. This book is part of the Context and Practice Series, edited by Michael Hunter Schwartz, Professor of Law and Dean of the University of Arkansas at Little Rock Bowen School of Law. KUDOS. \"

-- Robin Boyle Laisure, St. I think it is a remarkably good textbook. I really like the real world perspective with making it problem-based. I truly believe this casebook and the marvelous teaching materials that accompany it now set the standard by which new casebooks should be judged. I will be using it next time I teach Contracts. Not only is it teaching/student oriented, I found it substantively to be very well thought out. Johns University School of Law 020e098b27

This classic casebook, now in its 9th Edition, offers first-year students a solid and inviting introduction to contract law, recognizing both the English and American common law traditions and bringing them into our age of statutes, most particularly the Uniform Commercial Code. The 9th Edition will feel familiar yet fresh to current users and both exciting and comfortable to newcomers. Like earlier editions, the 9th Edition features carefully-selected cases, well-tailored notes and problems, and authoritative textual discussions of major developments in current contract law. These include the meaning of assent and agreement (with particular focus on the online environment and in the context of mandatory arbitration clauses); attention to comparative and international approaches; and accessible discussion of theoretical underpinnings of contract doctrine, the importance of which remain a mainstay of this new edition. Cases are situated within a variety of disciplines--history, economics, philosophy, and ethics--and present the law in a variety of typical settings--commercial, familial, employment, consumer, real estate and so on. The

casebook is ecumenical in its outlook, presenting a well-balanced approach that is usable by professors with a wide-range of theoretical outlooks and pedagogical styles 020e098b27

This casebook allows students to learn more effectively by providing critical reading and thinking questions and well-situated text boxes with supplemental information to explain and expand understanding. Provisions from the Restatement, UCC, CISG, and UNIDROIT appear in text, eliminating the need for a statutory supplement. With better advance preparation, class can begin at a more sophisticated level and proceed to deeper issues. It includes classic cases foundational in the historical development of many concepts and newer cases chosen for their teachability and lessons about modern business practices and current issues. The book is organized chronologically in the traditional order for contract analysis. The material is presented in a visually engaging manner, and the

accompanying electronic version provides live links to cited sources and useful websites. Practice Pointers provide a transactional focus by explaining the function of common contract clauses. The book includes both essay and multiple choice problems that encourage periodic review 020e098b27

A number of useful decisions from the Commonwealth are included. It also includes a new chapter on damages for defective building work, a topic which has generated a number of extremely important new cases. The major part of the law of building contracts is laid down in decided cases, scattered throughout a large number of series of reports which are generally not accessible to the non-lawyer. For the majority of cases, verbatim extracts from the judgment are given. Construction professionals must be familiar with these cases and this important book is designed to help them. There have been many new cases in construction law since the last edition was published in 1990, and the Third Edition takes account of the most

important of these. It brings together a wide range of cases on the main aspects of the subject, states the principle established and gives a summary of the facts and the decision. The section on key tort cases has also been extended. The casebook presents the leading cases on the topic, together with many lesser-known but important decisions. Throughout, the authors' approach is practical rather than academic 020e098b27

" More specifically, this chapter includes issues relating to leases, condominium bylaws and custody disputes, to name a few, where companion animals are at the heart of the dispute (both literally and figuratively). In particular, the valuation and measure of damages in tort cases, where the injured or killed victim is a beloved companion animal, is the focus in a growing number of cases throughout the country, as is the question of which tort causes of actions may be available to plaintiffs in this circumstance. The lessons we learn from these intersecting spheres

of law are important and can help us reframe our understanding of individual substantive areas. While this balancing may come up in various contexts within tort law, it is especially central to tort cases involving harms done to animals.

CONTRACT LAW CHAPTER on RedShelf Studying cases that involve sentient living beings enables students to think more deeply about the role of contracts in American society. For law professors looking for new tools to help explain core legal concepts, this book provides a fresh perspective on teaching such courses as

Property, Contracts, Torts, Constitutional Law, Criminal Law, Remedies, Environmental Law and Wills & Trusts. As just one example, students will be exposed to the sorts of questions prosecutors and judges have to consider concerning the pre-trial forfeiture of evidence when that evidence is a live animal who cannot be humanely \"stored\" in an evidence room. For example, students might have to grapple with a case in which the testator tried to create an estate plan to provide lifetime care for her five beloved dogs, but family members challenged

her will in order to gain access to the residue, without having to wait for the last dog to die of natural causes; or cases where courts have to determine whether to interject their own view of what constitutes a reasonable amount of money to leave for the care of the decedent's companion animals, even if it conflicts with the testator's expressed intent. PROPERTY LAW CHAPTER on RedShelf Animal Law poses a fundamental question: How is the legal analysis of property law affected when the interests of sentient (but non-human) beings are considered. Tort law involving animals, especially in cases of harm to companion animals, offers students a firsthand look at how courts approach their role in keeping the common law up-to-date with changing societal views and their rationales for doing so, or for holding firm to past precedents and deferring to state legislatures for such change. Adding animal law concepts to a torts course engages students in analyzing how the legal system responds to changing societal values, and allows them to more clearly see bridges between legal fields. Reviewing animal law cases will

encourage students to think critically and question the function of certain legal constructs that, in many respects, have not been rigorously challenged for more than a century. Each individual subject area ebook begins with the front matter for the entire book, including the "General Overview. Adding animal law cases to the course syllabus offers a fresh and engaging way for students to approach core legal concepts, as well as the opportunity to think creatively about the application and development of estate planning and probate law. CRIMINAL LAW CHAPTER on RedShelf Incorporating animal law cases within a criminal law course will help students understand how the law develops in response to new information and evolving social consensus about what constitutes cruelty and which species are protected. ENVIRONMENTAL LAW CHAPTER on RedShelf Bringing animal law concepts into an environmental law class allows students to address structural change to legal principles in an explicit and rigorous manner. WILLS and TRUSTS LAW CHAPTER on RedShelf Practitioners of wills, trusts and probate law

increasingly encounter animal owners who wish to provide for the care of their animals at their incapacity or death. Moreover, animals are legally classified as property. The property classification of animals, in particular, results in inconsistent legal outcomes. One example addresses concentrated animal feeding operations (CAFOs), which not only confine animals in substandard conditions, but also have deleterious effects on the environment (air, water and soil). If you teach a related course, and want to consider a subject area ebook for adoption (for example, the property chapter in a property course), contact comp@cap-press. If the behavior is the same, and the legal consequence is different, one may question whether the contextual differences support that outcome. Due to the ubiquitous presence and use of animals in our society, animal law overlaps with these and other areas of law. However, scientifically, animals are classified as living beings with certain capacities. Analyzing animal law cases within traditional areas of law encourages critical thinking and questioning of the function of certain legal constructs, sharpens

our legal analysis and tests the law's ability to respond to changing realities. Issues raised by animal law cases include: whether the legal system adequately addresses the interests of animals in contracts in which they are the subject matter; and, whether, in a contract dispute, the animal(s) can or should be considered an "interested party. In the past three decades, criminal anti-cruelty laws have been strengthened in all fifty states. This chapter also considers the core question of whether animals should be removed from the property status. For example, students can be asked to examine how and what sort of plaintiff would be able to allege standing to sue when the victim of an injury is a factory farmed, research or zoo animal, providing students with an opportunity to think creatively about the application and development of key constitutional law principles in a context that is increasingly relevant in our society, but which may be new to many students. Students will learn how this plays out in prosecutions, convictions and sentencing. While the law generally fails to explicitly distinguish between living beings (non-

human animals) and inanimate objects, the dissonance between the scientific and legal realities creates anomalies within the law, which are surfacing with increasing frequency. If approved, we will send access to the requested ebook chapter:

CONSTITUTIONAL LAW CHAPTER on RedShelf Including animal law cases creates a fresh lens through which to explore core constitutional law concepts, such as standing. com. TORT LAW CHAPTER on RedShelf American society is undergoing a significant change in the treatment of animals, particularly the animals who live with human beings and are increasingly considered to be family members.

For example, a person who owns a domesticated mouse cannot legally poison or cruelly kill the mouse, whereas it is standard practice -- and legal -- to trap, kill, or poison mice who come into our homes and are considered pests. Individual topics are available as ebooks. Because our legal system treats animals as property in some cases, and as quasi-property beings in other cases, judges and legislatures are creating new rules to balance existing law with a growing recognition of the

special character of living forms of property. Students will also learn about the Endangered Species Act and many other federal laws that impact individual animals as well as species 020e098b27

contracts and which requirements can be contracted around A large set of problems, many of which involve tasks assigned to new transactional lawyers and litigators, to allow students to learn the material through active participation and critical thinking. It explores how parties “contract around” default requirements of the law, in addition to satisfying mandatory aspects of the law, through contracts. It then challenges students to apply that law through transactional and litigation practice and simulation problems. The 2013 supplement to Sales: A Context and Practice Casebook is available to professors upon adoption of this book. This book is part of the Context and Practice Series, edited by Michael Hunter Schwartz, Professor of Law and Dean of the University of Arkansas at Little Rock Bowen School of Law. It is aimed at upper division students who are tired of reading and briefing cases and are interested in what lawyers really do. If you have adopted the book for a course, contact mjones (at) cap-press (dot) com to request the supplement. Please include in the email the

school and name of the course for which you have adopted this book. Students use cases the way lawyers use cases: to solve problems. This book uses samples of sales contracts and problems drawn from actual case files to engage students in the role of a lawyer involved in a sales transaction. The problems in this text are somewhat more complex than those found in most teaching texts. This book is unique due to its emphasis on deconstructing statutes and using a variety of visual aids to help students become experts in the application of the law to facts to solve a problem. Instead, students can focus on developing proficiency in reading statutes and solving problems. In particular, it uses numerous diagrams to help students deconstruct statutes and to help students organize their analysis of sales problems. The supplement includes additional problems, tables, and errata based on students' in-class engagement with Sales, as well as three new practice exams. The text includes more narrative discussion than many texts, so students do not have to struggle to learn the basic rules 020e098b27

Making and Doing Deals is a book that your students will enjoy learning from both during the course and beyond. Since the First Edition, students have been reading Making and Doing Deals because the cases, problems, and text not only help them

learn what they need to know as first-year law students, but also address the real-world problems and situations they will encounter long after they graduate. It's a book that students find entertaining (at least compared to their other law books) and, therefore, a book that they will read. It is also a book that should be fun for you to teach from 020e098b27

This book is part of the Context and Practice Series, edited by Michael Hunter Schwartz, Professor of Law and Dean of the University of Arkansas at Little Rock Bowen School of Law. I will be using it next time I teach Contracts. KUDOS. I really like the real world perspective with making it problem-based. Unfortunately, it is fantastic -- everything I've been looking for. The comprehensive Teacher's Manual includes PowerPoint slides keyed to the text and dozens of multiple choice and essay questions (with answers and explanations) and is printed with a CD included. This volume is a paperback edition of the original casebound title published in

2009. \ " -- Stephen Friedman, Associate Professor of Law, Widener University School of Law \ "[This] is the first law school textbook I've seen where it is obvious that the authors really want to help students understand what they are supposed to be learning in the course. \ " -- Robin Boyle Laisure, St. The book balances traditional cases with wonderfully designed problems and exercises that get students to think (and often act) like lawyers. \ " -- Roberto Corrada, University of Denver College of Law \ "I received this new casebook with great hope that it would be horrible so I wouldn't have to go through the ordeal of switching. Every chapter in this innovative casebook places students in roles as practitioners handling simulated law practice problems; provides context in the form of an overview of the law, similar to that which an attorney would read before reading cases in a new subject area; includes questions designed to encourage students to find the applicable statutes and cases on point in the state where the student is planning to practice law; includes exercises, visual aids, and case reading scaffolds, designed

to engage students with a wide range of learning styles; and ends with professionalism questions addressing ethical and professional identity questions suggested by the materials in the chapter. Contracts also includes a rolling graphic organizer that unfolds as students work through the text, as well as exercises designed to build students self-directed learning strategies. Students will find the book as intellectually challenging as any textbook they will encounter, but students who diligently work their way through the book should emerge with a solid understanding of contract law, and much more. In April 2012, the Institute for the Advancement of the American Legal System recognized Professor Schwartz as an Educating Tomorrow's Lawyers fellow and his course as one that advances reform in legal education. \" -- Bruce Price, University of San Francisco School of Law

\"[Contracts] is brilliant. The supplementary materials are plentiful (the CD and the TM). I truly believe this casebook and the marvelous teaching materials that accompany it now set the standard by which new casebooks should be judged.

"The contextual approach keeps students engaged and excited. Not only is it teaching/student oriented, I found it substantively to be very well thought out." --

Roy Stuckey, author of Best Practices for Legal Education (2007), in The Law Teacher "I had a chance to look at your Contracts casebook and I loved it. I think it is a remarkably good textbook. Right up front, the authors tell students the learning objectives of the course. After having revolutionized how to most effectively teach law students, Schwartz has produced an amazing doctrinal resource that will change how Contracts is taught. This well established reference book brings together leading cases on building contracts to illustrate legal principles. The latest edition includes a number of new cases since the last edition was published in 1999.
