Run WPCleaner in the command line with a command such as: 0cd2d6a3cc Special:Contributions/117.194.253.9 0cd2d6a3cc This image [1] was uploaded about a year ago, identified as a "private photo," and supposedly GFDL-licensed by an editor who did not

have any rights in the image to license. None of the standard IFD processes appear to apply in this case. The image is plainly not a "private photo"; it is clearly a video capture/screenshot (note the characteristic distortion at the bottom of the picture). The image is drawn from a commercial bootleg video, and therefore cannot be validly licensed for Wikipedia use. We need reliable authorship / copyright-holder information for all of our infringing material. Development of Avatar began in 1994, when Cameron wrote an 80-page treatment for the film. Filming was due to take place after the completion of Cameron's 1997 film Titanic, for a planned release in 1999; however, according to Cameron, the necessary technology was not yet available to achieve his vision of the film. Work on the fictional constructed language of the Na'vi began in 2005, and Cameron began developing the screenplay and fictional universe in early 2006.
