Database The DBMS additionally encompasses the core facilities provided to administer the database. is often used to refer to any collection of related data (such as a spreadsheet or a card index) as size and usage requirements typically necessitate In computing, a database is an organized collection of data or a type of data store based on the use of a database management system (DBMS), the software that interacts with end users, applications, and the database itself to capture and analyze the data. Often the term "database" is also used loosely to refer to any of the DBMS, the database system or an application associated with the database. The sum total of the database, the DBMS and the associated applications can be referred to as a database system 4da9a786cd

Decision-making The decision-making process is a reasoning process based on assumptions of values, preferences and beliefs of the decision-maker. Every decision-making process produces a final choice, which may or may not prompt action. Cambridge, UK; New York: Cambridge University In psychology, decision-making (also spelled decision making and decisionmaking) is regarded as the cognitive process resulting in the selection of a belief or a course of action among several possible alternative options. Monahan, George E. (2000). OCLC 37666447. It could be either rational or irrational. Management decision making: spreadsheet modeling, analysis, and application 4da9a786cd

Glossary of computer science This glossary of computer science is a list of definitions of terms and concepts used in computer science, its sub-disciplines, and related fields, including terms relevant to software, data science, and computer programming. Lewis, John; Loftus, William (2008). ISBN 978-0-321-53205-3. Java Software Solutions Foundations of Programming Design 6th ed. Pearson Education Inc 4da9a786cd

< 16 April 4da9a786cd Centralized discussion 4da9a786cd OLAP tools enable users to analyse multidimensional data interactively from multiple perspectives. OLAP consists of three basic analytical operations: consolidation... 4da9a786cd Village pumps 4da9a786cd There are two types of events... 4da9a786cd Arithmetic In a wider sense, it also includes exponentiation, extraction of roots, and taking logarithms. problem-solving, data analysis, and algorithms, making them integral to scientific research, technological development, and economic modeling. Arithmetic portal Arithmetic is an elementary branch of mathematics that deals with numerical operations like addition, subtraction, multiplication, and division 4da9a786cd

Risk management There are also integrated Risk management is the identification, evaluation, and prioritization of risks, followed by the minimization, monitoring, and control of the impact or probability of those risks occurring. FTA analysis requires diagramming software. Retail traders also apply risk management by using fixed percentage position sizing and risk-to-reward frameworks to avoid large drawdowns and support consistent decision-making under pressure.). and validation results etc. e, threats) including uncertainty in international markets, political instability, dangers of project failures (at any phase in design, development, production, or sustaining of life-cycles), legal liabilities, credit risk, accidents, natural causes and disasters, deliberate attack from an adversary, or events of uncertain or unpredictable root-cause. FMEA analysis can be done using a spreadsheet program. Risks can come from various sources (i 4da9a786cd

Wikipedia:Articles for deletion/Log/2012 April 17 Gregory Recent AfDs: Today Yesterday August 24 (Sun) August 23 (Sat) August 22 (Fri) More. requires a Spreadsheet & the Excel software package, which introduces Geometry to present a chart display, that is then used to estimate a decision

Research about decision-making is also published under the label problem solving, particularly in European psychological research. misc tech Before digital storage and retrieval of data have become widespread, index cards were used for data storage in a wide range of applications and environments: in the home to record and store recipes... The uncoun ted plural, geographic information systems, also abbreviated GIS, is the most common term for the industry and profession concerned with these systems. The academic discipline that studies these systems and their underlying geographic principles, may also be abbreviated as GIS, but the unambiguous... Geographic information system Much of this often happens within a spatial database; however, this is not essential to meet the definition of a GIS. with GIS, multi-criteria decision analysis methods support decision-makers in analysing a set of alternative spatial solutions, such as the most likely A geographic information system (GIS) consists of integrated computer hardware and software that store, manage, analyze, edit, output, and visualize geographic data. In a broader sense, one may consider such a system also to include human users and support staff, procedures and workflows, the body of knowledge of relevant concepts and methods, and institutional organizations

Online analytical processing Microsoft Analysis Services, which drove wide adoption of OLAP technology and moved it into the mainstream. Typical applications of OLAP include business reporting for sales, marketing, management reporting, business process management (BPM), budgeting and forecasting, financial reporting and similar areas, with new applications emerging, such as agriculture. The term OLAP was created as a slight modification of the traditional database term online transaction processing (OLTP). OLAP is part of the broader category of business intelligence, which also encompasses relational databases, report writing and data mining. OLAP clients include many spreadsheet programs In computing, online analytical processing (OLAP) (), is an approach to quickly answer multi-dimensional analytical (MDA) queries
