This excludes pages with more than 1000 incoming mainspace links, which are: ad48cab96d Wikipedia:Citing IMDb: 3741 ad48cab96d The list contains 50,052 articles. --Cewbot (talk) 14:18, 26 August 2025 (UTC) ad48cab96d

Smart city transit, and outdoor lighting. Data is collected from citizens, devices, buildings, or cameras. Smart cities uses digital technology to collect data and operate services. Smart cities. Smart cities integrate Information and Communication Technologies (ICT), and devices connected to the Internet of Things A smart city is an urban model that leverages technology, human capital, and governance to enhance sustainability, efficiency, and social inclusion, considered key goals for the cities of the future. The foundation of a smart city is built on the integration of people, technology, and processes, which connect and interact across sectors such as healthcare, transportation, education, infrastructure, etc. Applications include traffic and transportation systems, power plants, utilities, urban forestry, water supply networks, waste disposal, criminal investigations, information systems, schools, libraries, hospitals, and other community services ad48cab96d

Wireless With radio waves, intended distances can be short, such as a few meters for Bluetooth, or as far as millions of kilometers for deep-space radio communications. It encompasses various types of fixed, mobile, and portable applications, including two-way radios, cellular telephones, and wireless networking. Wireless communication (or just wireless, when the context allows) is the transfer of information (telecommunication) between two or more points without Wireless communication (or just wireless, when the context allows) is the transfer of information (telecommunication) between two or more points without the use of an electrical conductor, optical fiber or other continuous guided medium for the transfer. The most common wireless technologies use radio waves. Other examples of applications of radio wireless technology include GPS units, garage door openers, wireless computer mice, keyboards and headsets, headphones, radio receivers, satellite ad48cab96d

Titan submersible implosion horizontal and two vertical. Its steering controls consisted of a Logitech F710 wireless game controller with modified longer analogue sticks resembling traditional On 18 June 2023, Titan, a submersible operated by the American tourism and expeditions company OceanGate, imploded during an expedition to view the wreck of the Titanic in the North Atlantic Ocean off the coast of Newfoundland, Canada. Aboard the submersible were Stockton Rush, the American chief executive officer of OceanGate; Paul-Henri Nargeolet, a French deep-sea explorer

and Titanic expert; Hamish Harding, a British businessman; Shahzada Dawood, a Pakistani-British businessman; and Dawood's son, Suleman

Two-way radios usually use a half-duplex communication channel, which permits two-way communication, albeit with the limitation that only one user can transmit at a time. (This is in contrast to simplex communication, in which transmission can only be sent in one direction, and full-duplex, which allows transmission in both directions simultaneously.) This requires users in a group to take turns talking. The radio is normally in receive mode so the user can hear all other transmissions on the channel. When the user wants...

Italians also contributed in theorizing civil law, scientific method (particularly in the fields of physics and astronomy), double-entry bookkeeping, mathematical algebra and analysis, classical and celestial mechanics. Often, things discovered for the first time...

Two-way radio Goldsmith, Andrea (8 Aug 2005). p. ISBN 9780521837163 A two-way radio is a radio transceiver (a radio that can both transmit and receive radio waves), which is used for bidirectional person-to-person voice communication with other users with similar radios, in contrast to a broadcast receiver, which only receives transmissions. Cambridge University Press. Electronics, 7th Ed. ISBN 9780080511986. Elsevier. 811.
Wireless Communications

Italian people – living in the Italic peninsula or abroad – have been throughout history the source of important inventions and innovations in the fields of writing, calendar, mechanical and civil engineering, musical notation, celestial observation, perspective, warfare, long distance communication, storage and production of energy, modern medicine, polymerization and information technology.
