== Education and career == 8048f4f3cc Ada – named after Ada Lovelace, who is considered by many to be the first programmer. 8048f4f3cc Although Canadian links to the Congo date back to the Victorian era, formal involvement began in the 1940s with a push for closer commercial ties. In 1948, Canada appointed a trade commissioner to Léopoldville (now Kinshasa), and in the decades since, relations have generally been characterized by Canadian investment, development assistance, technical cooperation, and ongoing diplomatic

engagement. 8048f4f3cc Grails was developed to address a number of goals: 8048f4f3cc Cohn was born in Chicago, Illinois in 1920 to Harry and Ethel Cohn, parents of Eastern European Jewish heritage. He married Sylva May on March 20, 1949, and had five children. He served in the United States Army from June 1943 until April 1946 working as a biochemist in the 203rd General Hospital Division in France and England. 8048f4f3cc

After the war, he attended University of Chicago, graduating with a B.A. and M.S. in 1946. He later attended University of California Berkeley where he received his Ph.D. in 1952 in physiology and radiobiology. His thesis was titled The Effects of Ionizing Radiation on the Growth and Metabolism of Bone. 8048f4f3cc

Head First (book series) Head First Ruby (ISBN 1-449-37265-1) by Jay McGavren Head First Servlets & JSP (ISBN 0-596-51668-1) by Bryan Basham, Kathy Sierra and Bert Bates Head Head First is a series of introductory instructional books to many topics, published by O'Reilly Media. It stresses an unorthodox, visually intensive, reader-involving combination of puzzles, jokes, nonstandard design and layout, and an engaging, conversational style to immerse the reader in a given topic 8048f4f3cc

ABEND – originally from an IBM System/360 error message, short for "abnormal end". Jokingly reinterpreted as German Abend ("evening"), because "it is what system operators do to the machine late on Friday when they want to call it a day." 8048f4f3cc AWK – composed of the initials of its authors Aho, Weinberger, and... 8048f4f3cc When they are passed multiple parameters with the same name, here is how various back ends behave. 8048f4f3cc Names of many computer terms, especially computer applications, often relate to the function they perform, e.g., a compiler is an application that compiles (programming language source code into the computer's machine language). However, there are other terms with less obvious origins, which are of etymological interest. This article lists such terms. 8048f4f3cc Sierra attended Cal Poly San Luis Obispo with a major in exercise physiology and spent 10 years

working in the fitness industry. She changed careers after attending programming classes at UCLA, later returning to teach a course on "new media interactivity" for UCLA Extension. She led the new media team at Mind over Macintosh, a Los Angeles training center that provided training to advertising and entertainment corporations adapting digital technologies in the mid-1990s. She was the lead programmer on the computer games Terratopia, a 1998 children's adventure game released by Virgin Sound & Vision, and All Dogs Go to Heaven, a film-based game released as a free cereal premium by MGM. She also worked as a master trainer for Sun Microsystems, teaching Java instructors how to introduce new Java technologies and developing certification exams. In 1998, she founded the Java programmers' online community JavaRanch.

Grails was previously known as "Groovy on Rails"; in March 2006 that name was dropped in response to a request by David Heinemeier Hansson, founder of the Ruby on Rails framework. Work began in July 2005, with the 0.1 release on March 29, 2006, and the 1.0 release announced on February 18, 2008. 8048f4f3cc 01:29:27 (2, 3, 5) (EDIT) User:72.94.164.21 (contribs, talk) edited Duloxetine (diff, hist)Changed: 'image' ('Duloxetine Structural Formulae.png' -> 'Duloxetine.png') 8048f4f3cc There is no RFC standard on what should be done when it has passed multiple parameters. HTTP parameter pollution It was first brought forth to the public in 2009 by Stefano di Paola and Luca Carettoni, in the conference OWASP EU09 HTTP Parameter Pollution (HPP) is a web application vulnerability exploited by injecting encoded query string delimiters in already existing parameters. The vulnerability occurs if user input is not correctly encoded for output by a web application. The impact of such vulnerability varies, and it can range from "simple annoyance" to complete disruption of the intended behavior of a web application. It was first brought forth to the public in 2009 by Stefano di Paola and Luca Carettoni, in the conference OWASP EU09 Poland. into web application-created URLs. Overriding HTTP parameters to alter a web application's behavior, bypassing input and access validation checkpoints, as well as other indirect vulnerabilities, are possible consequences of a HPP attack. This vulnerability allows the injection of parameters into web application-created URLs 8048f4f3cc

It was suggested that the name was appropriate, as Apache began as a series of patches to code written for NCSA's HTTPd daemon.
