Vertical form fill sealing machine Both solids and liquids can be bagged. The machine constructs plastic bags and stand-up pouches out of a flat roll of film, fills them with product, and seals them. Walter Zwoyer, the inventor of the technology, patented his idea for the VFFS machine in 1936 while working with the Henry Heide Candy Company. a type of automated assembly-line product packaging system, commonly used in the packaging industry for food and many other products. Walter Zwoyer, A vertical form fill sealing machine is a type of automated assembly-line product packaging system, commonly used in the packaging industry for food and many other products 7c37feae36

Die (manufacturing) handbook of paper and wood packaging technology, DEStech, p. Stamping dies are used with a press, as opposed to drawing dies (used in the manufacture of wire) and casting dies (used in molding) which are not. 436, ISBN 978-1-932078-42-8, archived from the original on 2017-11-28. Soroka, Walter (2008) A die is a specialized machine tool used in manufacturing industries to cut and/or form material to a desired shape or profile. Like molds, dies are generally customized to the item they are used to create
