List of datasets for machine-learning research Datasets are an integral part of the field of machine learning. “Proceedings of the 4th Augmented Human International Conference. High-quality labeled training datasets for supervised and semi-supervised machine learning algorithms are usually difficult and expensive to produce because of the large amount of time needed to label the data. Major advances in this field can result from advances in learning algorithms (such as deep learning), computer hardware, and, less-intuitively, the availability of high-quality training datasets. Although they do not need to be labeled, high-quality datasets for unsupervised learning can also be difficult and costly to produce. Eduardo, et al. “Qualitative activity recognition of weight lifting exercises. ACM These datasets are used in machine learning (ML) research and have been cited in peer-reviewed academic journals 0c8d576a3e
