Open-design movement The process is generally facilitated by the Internet and often performed without monetary compensation. Open design is a form of co-creation, where the final product is designed by the users, rather than an external stakeholder such as a private company. The process is generally facilitated by The open-design movement involves the development of physical products, machines and systems through use of publicly shared design information. The goals and philosophy of the movement are identical to that of the open-source movement, but are implemented for the development of physical products rather than software. information. This includes the making of both free and open-source software (FOSS) as well as open-source hardware. Open-source journalism the standard journalistic techniques of news gathering and fact checking, and reflected a similar term—open-source intelligence—that was in use from 1992 Open-source journalism, a close cousin to citizen journalism or participatory journalism, is a term coined in the title of a 1999 article by Andrew Leonard of Salon. com. Ingles-le Nobel, had solicited feedback on a story about cyberterrorism from Slashdot readers, and then re-wrote his story based on that feedback and compensated the Slashdot writers whose information and words he used. Although the term was not actually used in the body text of Leonard's article, the headline encapsulated a collaboration between users of the internet technology blog Slashdot and a writer for Jane's Intelligence Review. Open-source intelligence on OSINT tools and techniques. OSINT is primarily used in national security, law enforcement, and business intelligence functions and is of value to analysts who use non-sensitive intelligence in answering classified, unclassified, or proprietary intelligence requirements across the previous intelligence disciplines. Books such as Michael Bazzell's Open Source Intelligence Techniques serve as indices to resources across multiple domains Open source intelligence (OSINT) is the collection and analysis of data gathered from open sources (overt sources and publicly available information) to produce actionable intelligence cfd06e7568

Market intelligence Sources of internal intelligence gathering include but are not limited to, Market intelligence (MI) is gathering and analyzing information relevant to a company's market - trends, competitor and customer (existing, lost and targeted) monitoring. gather MI, one system is that is used is Open-source Intelligence system. It is a subtype of competitive intelligence (CI), which is data and information gathered by companies that provide continuous insight into market trends such as competitors' and customers' values and preferences cfd06e7568

CI means understanding and learning what is happening in the world outside the business to increase one's competitiveness. It means learning as much as possible, as soon as possible, about one... cfd06e7568

Open source The open source model is a decentralized software development model that encourages open collaboration. Open source is source code that is made freely available for possible modification and redistribution. The page deals with Clandestine HUMINT operational techniques, also known as "tradecraft". It applies to clandestine operations for espionage, and a clandestine phase before direct action (DA) or unconventional warfare (UW). Clandestine HUMINT sources at certain times act as local guides for special reconnaissance (SR). cfd06e7568 This early usage of the phrase clearly implied the paid use, by a mainstream journalist, of copyright-protected posts made in a public online forum. It thus referred to... cfd06e7568 MI along with the marketing capabilities of an organization provides a guideline into the allocation and implementation of resources and processes. It is used for the purpose of continuously supplying strategic marketing planning for organizations to gauge marketing positions in order for companies to gain competitive advantage and best meet objectives. cfd06e7568 Open-source software development can bring in diverse perspectives beyond those of a single company. A 2024 estimate of the value of open-source software to firms is \$8.8 trillion, as firms would need to spend 3.5 times the... cfd06e7568 Organizations can develop MI frameworks and models that are suited... cfd06e7568 Open-source software software and its source code to anyone and for any purpose. The ability to examine the code facilitates public trust in the software. Open-source software may be developed in a collaborative, public manner. Open-source software is Open-source software (OSS) is computer software that is released under a license in which the copyright holder grants users the rights to use, study, change, and distribute the software and its source code to anyone and for any purpose. Open-source software is a prominent example of open collaboration, meaning any capable user is able to participate online in development, making the number of possible contributors indefinite. Open-source software may be developed in a collaborative, public manner cfd06e7568

A main principle of open source software development is peer production, with products such as source code, blueprints, and documentation freely available to the public. The open source movement in software began as a response to the limitations of proprietary code. The model is used for projects such as in open source eCommerce, open source appropriate technology, and open source drug discovery. cfd06e7568

Competitive intelligence It is the action of defining, gathering, analyzing, and distributing intelligence about products, customers, competitors, and any aspect of the environment needed to support executives and managers in strategic decision making for an organization. operations. Competitive intelligence involves systematically collecting and analysing information from multiple sources and a coordinated competitive intelligence program. It is a form of open-source intelligence practiced by diverse international and local businesses. Competitive intelligence is a legal business practice Competitive intelligence (CI) or commercial intelligence is the process and forward-looking practices used in producing knowledge about the competitive environment to improve organizational performance cfd06e7568

Signals intelligence As classified and sensitive information is usually encrypted, signals intelligence may necessarily involve cryptanalysis (to decipher the messages). Traffic analysis—the study of who is signaling to whom and in what quantity—is also used to integrate information, and it may complement cryptanalysis. station Open-source intelligence Radio Reconnaissance Platoon RAF Intelligence Sentient (intelligence analysis system) Signals intelligence by alliances Signals intelligence (SIGINT) is the act and field of intelligence-gathering by interception of signals, whether communications between people (communications intelligence—abbreviated to COMINT) or from electronic signals not directly used in communication (electronic intelligence—abbreviated to ELINT) cfd06e7568

Many of the techniques are important in counterintelligence. Defensive counterintelligence personnel needs to recognize espionage, sabotage, and so on, in process. Offensive counterintelligence specialists may use them against foreign intelligence services (FIS). cfd06e7568 Open source promotes universal access via an open-source or free license to a product's... cfd06e7568

Human intelligence (intelligence gathering) Although associated with military and intelligence agencies, HUMINT can also apply in various civilian sectors such as law enforcement. HUMINT can be conducted in a variety of ways, including via espionage, reconnaissance, interrogation, witness interviews, or torture. It is distinct from more technical intelligence-gathering disciplines, such as signals intelligence (SIGINT), imagery intelligence (IMINT) and measurement and signature intelligence (MASINT). Human intelligence (HUMINT, pronounced /?hju?m?nt/ HEW-mint) is intelligence-gathering by means of human sources and interpersonal communication.
