Supply chain management Coase, 1998 [full citation needed] Knowledge @ Wharton staff writers, Supply-chain Management: Growing Global Complexity Drives Companies into the 'Cloud'; In commerce, supply chain management (SCM) deals with a system of procurement (purchasing raw materials/components), operations management, logistics and marketing channels, through which raw materials can be developed into finished products and delivered to their end customers. Interconnected, interrelated or interlinked networks, channels and node businesses combine in the provision of products and services required by end customers in a supply chain. A more narrow definition of supply chain management is the "design, planning, execution, control, and monitoring of supply chain activities with the objective of creating net value, building a competitive infrastructure, leveraging worldwide logistics, synchronising supply with demand and measuring performance globally". This can include the movement and storage of raw materials, work-in-process inventory, finished goods, and end-to-end order fulfilment from the point of origin to the point of consumption e87d125c26

Design management " The discipline of design management overlaps with marketing management, operations management, and strategic management. "Simply put, design management is the business side of design. Schools (such as the Rotman School of Management, Wharton University of Pennsylvania and MIT Sloan Executive Education) have acted on this interest and developed Design management is a field of inquiry that uses design, strategy, project management and supply chain techniques to control a creative process, support a culture of creativity, and build a structure and organization for design. Design management encompasses the ongoing processes, business decisions, and strategies that enable innovation and create effectively-designed products, services, communications, environments, and brands that enhance our quality of life and provide organizational success. Design management is a comprehensive activity at all levels of business (operational to strategic), from the discovery phase to the execution phase. The objective of design management is to develop and maintain an efficient business environment in which an organization can achieve its strategic and mission goals through design e87d125c26
