A logical organization allows you to focus on those areas in which you need more practice, with units on: (1) labeling, (2) terminology, (3) tooth structure, and (4) case-based application. Corresponding to the chapters in *Illustrated Dental Embryology, Histology, and Anatomy*, 3rd Edition, this workbook helps you understand and apply material with case studies, labeling exercises, helpful guidelines, and more. 32 detachable flashcards help you master tooth morphology and tooth numbering. It includes 32 removable flashcards for quick, convenient review and study, and prepares you for the National Board Dental Hygiene Examination (NBDHE) with its case-based focus. Glossary exercises include crossword puzzles and word searches for practice and review of key terminology. Guidelines for Tooth Drawing include detailed instructions, tips, and dimensions for drawing each permanent tooth. Occlusal Evaluation shows how to perform an occlusal evaluation using the necessary equipment and steps. New case studies are added, and clinical and radiographic photographs and questions are expanded on existing cases, helping you prepare for the case-based focus of the NBDHE. Detailed case studies include radiographs, clinical photos, profiles, complaints, health histories, intraoral examination data, and multiple-choice questions, promoting critical thinking and providing preparation for board examinations. Three-hole-punched and perforated pages are easy to fit into a binder, and pages can be removed and turned into instructors for assignments or extra credit. Expanded labeling (structure identification) exercises include additional developmental, microbiological, and anatomical structures for more practice in correctly identifying various parts or structures.
