SAS programs have DATA SAS (previously "Statistical Analysis System") is data and artificial intelligence software developed by SAS Institute for data management, advanced analytics, multivariate analysis, business intelligence, and predictive analytics a5ab477b88

The secure attention key is designed to make login spoofing impossible, as the kernel

will suspend any program, including those masquerading as the computer's login process, before starting a trustable login operation. a5ab477b88 SAS was developed at North Carolina State University from 1966 until 1976, when SAS Institute was incorporated. SAS was further developed in the 1980s and 1990s with the addition of new statistical procedures, additional components and the introduction of JMP. A point-and-click interface was added in version 9 in 2004. A social media analytics product was added in 2010. SAS Viya, a suite of analytics and artificial intelligence software, was introduced in 2016. a5ab477b88

XWiki allows for the storing of structured data and the execution of server-side script within the wiki interface. Scripting languages including Velocity, Apache Groovy, Python, Ruby and PHP can be written directly into wiki pages using wiki macros. User-created data structures can be defined in wiki documents and instances of those structures can be attached to wiki documents, stored in a database, and queried using either Hibernate query language or XWiki's own query language. a5ab477b88 JMP is used in applications such as data mining, Six Sigma, quality control, design of experiments, as well as for... a5ab477b88
