Go (programming language) In Go the rule Go is a high-level general purpose programming language that is statically typed and compiled. org, but its proper name is Go. generality beyond that of simple enumerations "A Tutorial for the Go Programming Language". It is syntactically similar to C, but also has garbage collection, structural typing, and CSP-style concurrency. The Go Programming Language. Retrieved March 10, 2013. It is often referred to as Golang to avoid ambiguity and because of its former domain name, golang. It was designed at Google in 2007 by Robert Griesemer, Rob Pike, and Ken Thompson, and publicly announced in November of 2009. It is known for the simplicity of its syntax and the efficiency of development that it enables by the inclusion of a large standard library supplying many needs for common projects ebdacf29ac

Google Cardboard Named for its fold-out cardboard viewer into which a smartphone is inserted, the platform was intended as a low-cost system to encourage interest and development in VR applications. To use the platform, users run Cardboard-compatible mobile apps on their phone, place it into the back of the viewer, and view content through the lenses. Users can either build their own viewer from simple, low-cost components using specifications published by Google, or purchase a pre-manufactured one. The Demos mode, set in a static scene above a beach, includes a brief tutorial option, a display of museum objects from all angles, a My Videos, a Photo Google Cardboard is a discontinued virtual reality (VR) platform developed by Google ebdacf29ac
