Reference ranges for blood tests The Medical
Education Division of the Brookside Associates /
ABG (Arterial Blood Gas) Retrieved on Dec 6, 2009
Derived from molar values using Reference ranges
(reference intervals) for blood tests are sets of
values used by a health professional to interpret a
set of medical test results from blood samples.
Reference ranges for blood tests are studied within
the field of clinical chemistry (also known as "clinical
biochemistry", "chemical pathology" or "pure blood
chemistry"), the area of pathology that is generally
concerned with analysis of bodily fluids.
